

DENTAL CROWN

Dental crowns are used to restore or replace broken or missing teeth

You can choose from **different types of dental crowns**; **metal-based** crowns are of good quality for a more affordable price, while **zirconium-based** ones are suitable for patients with metal allergy and are a more aesthetic solution

A dental crown is a **long-term solution** for having broken or missing teeth - they come with **10-15 years guarantee**, but if you pay enough attention to your oral health, you can keep them for longer, maybe even for a lifetime

For they are fixed, after the treatment **you will have nothing to worry about** - you never need to take them out, you just need to clean them as if they were your real teeth

A dental crown is made to reconstruct the original looks of your teeth - with their help **you can have your perfect smile back**
