

All-on-4

Are you missing all your teeth and looking for a way to change your dentures to something permanent and aesthetic? Ask about "All-on-4"! The term refers to "all" teeth being supported "on four" dental implants. As a result, just 4 implants can replace all teeth in your upper or lower jaw even in a day!

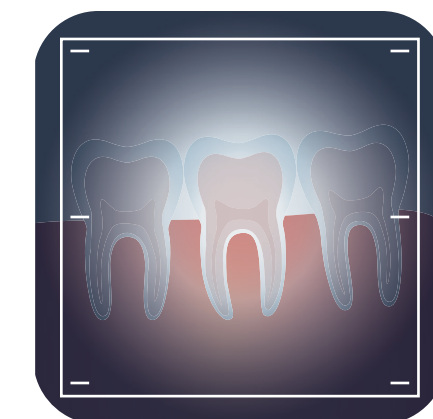

1

First consultation:
initial surgical assessment.

2

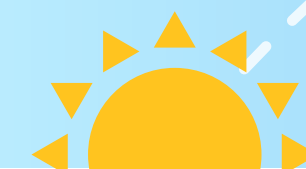

CBCT:
in most cases a 3D CBCT scan is required to plan your treatment.

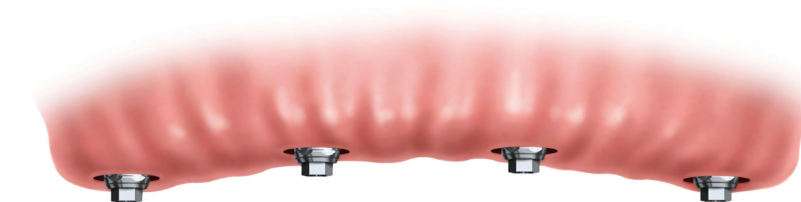

3

Same-day teeth / All-on-4 appointment:

Morning

Surgical appointment:
Implant placement under local anaesthesia.

Noon

Our technicians prepare the visible part of your new teeth.

Afternoon

Fitting: the visible part of your new teeth will be fitted.

As our Teeth in a Day treatment allows you to speak and smile without worrying of a sliding denture, giving an immense and immediate boost to your confidence within just one day.
